Index 2021

Volume 2

| Autorenregister | | Seite | |
|--|-----|---|-----|
| Antonov, S.; Arne, W.; Hietel, D.: Simulation von Meltblownprozessen – Parameterstudie für Polymertemperatur und Viskosität..... | 65 | Bruns, C.; Nickel, A.: Neuer Erklärungsansatz für das Meltblown-Paradoxon | 68 |
| Arne, W.; Hietel, D.; Antonov, S.: Simulation von Meltblownprozessen – Parameterstudie für Polymertemperatur und Viskosität..... | 65 | Gregorich, K.: Vliesstoff-Innovation trifft Nachhaltigkeit..... | 73 |
| Bozovic-Vucik, J.: Zertifiziert zirkulär und erneuerbar – neue nachhaltige und hochreine Polymere für Hygiene-Vliesstoffe | 102 | Heck, M.: Ultraschallschweißen für höchste Kraftansprüche | 53 |
| | | Hietel, D.; Antonov, S.; Arne, W.: Simulation von Meltblownprozessen – Parameterstudie für Polymertemperatur und Viskosität..... | 65 |
| | | Nickel, A.; Bruns, C.: Neuer Erklärungsansatz für das Meltblown-Paradoxon | 68 |
| | | Schmidt, M.R.: Vliesstoffe für 300 Mill. FFP2-Masken/Jahr mittels innovativer Meltblown-Technik | 166 |
| | | Siegel, R.: Stabile Arginin-Beschichtung von Nonwovens reduziert Infektiosität | 44 |
| | | Trenz, E.: Upcycling, Downcycling, Recycling, bessere Rohstoffausnutzung | 14 |

| Author Index | | Page | |
|--|-----|--|-----|
| Antonov, S.; Arne, W.; Hietel, D.: Simulation of meltblown processes – parameter study for polymer temperature and viscosity | 65 | Dhavale, A.J.; Burji, M.; Joshi, R.N.: Application of Box-Behnken design for modeling bursting strength of nonwovens air filters | 170 |
| Arne, W.; Hietel, D.; Antonov, S.: Simulation of meltblown processes – parameter study for polymer temperature and viscosity | 65 | Finnis, J.: Looking back to go forward – natural fiber innovation, 30,000 years in the making | 38 |
| Bansal, R.: Improving the sustainability of nonwovens in a cost-effective way | 78 | Gregorich, K.: Nonwovens innovation meets sustainability | 73 |
| Bozovic-Vucik, J.: Certified circular and renewable – new sustainable high-purity polymers for nonwovens in personal hygiene | 102 | Gulhane, S.; Shirsath, L.N.; Turukmane, R.; Daberao, A.: Review on nonwovens absorbent assemblies for oil-spill recovery | 168 |
| Bruns, C.; Nickel, A.: New approach to the meltblown-paradox | 68 | Gümus, A.; Dalbudak, U.B.: Development of sustainable and aesthetic acoustic nonwovens | 112 |
| Burji, M.; Joshi, R.N.; Dhavale, A.J.: Application of Box-Behnken design for modeling bursting strength of nonwovens air filters | 170 | Heck, M.: Ultrasonic welding for highest force requirements | 53 |
| Daberao, A.; Gulhane, S.; Shirsath, L.N.; Turukmane, R.: Review on nonwovens absorbent assemblies for oil-spill recovery | 168 | Hietel, D.; Antonov, S.; Arne, W.: Simulation of meltblown processes – parameter study for polymer temperature and viscosity | 65 |
| Dalbudak, U.B.; Gümus, A.: Development of sustainable and aesthetic acoustic nonwovens | 112 | Joshi, R.N.; Dhavale, A.J.; Burji, M.: Application of Box-Behnken design for modeling bursting strength of nonwovens air filters | 170 |
| | | Nickel, A.; Bruns, C.: New approach to the meltblown-paradox | 68 |
| | | Rathod, A.: UV protection characteristics of bamboo nonwovens..... | 76 |
| | | Ross, C.: Balancing environmental sustainability improvements and economic constraints..... | 114 |
| | | Schmidt, M.R.: Nonwovens for 300 million FFP2 masks/year using innovative meltblown technology | 166 |
| | | Shirsath, L.N.; Turukmane, R.; Daberao, A.; Gulhane, S.: Review on nonwovens absorbent assemblies for oil-spill recovery..... | 168 |
| | | Siegel, R.: Arginine coated nonwovens reduce infectivity of SARS-CoV-2..... | 44 |
| | | Timble, N.B.: Nonwovens made from blends of banana/polypropylene fibers..... | 100 |
| | | Trenz, E.: Upcycling, downcycling, recycling, better use of raw materials | 14 |
| | | Turukmane, R.; Daberao, A.; Gulhane, S.; Shirsath, L.N.: Review on nonwovens absorbent assemblies for oil-spill recovery..... | 168 |
| | | Yaldiz, Ü.: Interview: Greater than the sum of its individual parts | 178 |

| Firmenregister / Company Index | | Seite/page | Seite /page |
|--|---|--|---------------------------|
| A.Celli Nonwovens | 157 | Infinited Fiber Company | 160 |
| Advansa | 86, 150 | Innovatec Microfibre Technology | 10, 108, 126, 155 |
| Aeris Group | 116 | Intrinsic Advanced Materials | 174 |
| Ahlstrom-Munksjö | 62 | ISRA Vision | 85 |
| Albaad Massuot Yitzhak | 160 | ITA Aachen | 4, 26 |
| Amarande | 37 | Jakob Holm & Sons | 156 |
| Amotek | 148 | Jawaharlal Darda Institute of Engineering & Technology | 76 |
| Andritz | 3, 5, 13, 32, 35, 37, 52, 61, 67, 84, 118, 156, 160 | Karl Menzel Maschinenfabrik | 135 |
| Andritz Diatec | 119 | Kelheim Fibres | 6, 35, 130 |
| Andritz Laroche | 118 | Laroche | 13 |
| Andritz Nonwoven | 119 | Lenzing | 31, 63, 73, 129 |
| Atlas Copco | 85 | Lenzing Instruments | 132 |
| Auriga Polymers | 174 | LM Industries | 13 |
| Autefa Solution Germany | 31, 110 173 | Low & Bonar | 36 |
| Autoneum | 13, 34, 83 | LTG | 133 |
| Avgol | 174 | Mahlo | 134 |
| Beaulieu Fibres International | 174 | Maxcess International | 101 |
| Berry Global | 34 | Metsa Spring | 6 |
| BFT – Bast Fibre Technologies | 38, 165 | Miltec | 13 |
| bionic surfaces | 44 | Minet | 3 |
| Birla Cellulose | 78 | Mogul Tekstil | 8 |
| Bozzetto | 121 | Mondi | 35 |
| BWF | 83 | Mondon | 138 |
| Center for Textile Functions SVKM'S, NMIMS | 168 | MS Ultraschall Technologie | 53, 138 |
| Confidence Infrastructure | 110 | Nanoval | 40 |
| Curt G. Joa | 176 | National Sweden | 167 |
| Daimler | 163 | NatureWorks | 17 |
| Devan Chemicals | 178 | Neenah Gessner | 59 |
| DiloGroup | 59, 120 | nova-Institut | 6 |
